Top potential markets identified
- Estimated untapped potential in absolute value is largest in United Arab Emirates. UAE is ranked 4th in the list of leading markets for current exports of Palestinian tomatoes. Turkey has the largest untapped potential (USD 36.8 million), followed by Spain (USD 16.4 million). These countries are not among the top 5 of current suppliers, but are estimated to have high potential in coming years.
- Kuwait is the second largest market based on untapped potential: 56.9 thousand USD. Kuwait is the 7th largest destination. Jordan dominates supply in Kuwait market currently with 81% market share. It is a growing market, as Kuwait’s import increased on average with 14% yearly during 2013-2017.
- Qatar is the 6th largest destination for Palestinian tomatoes, but it has still an extra 340% potential.
- Russia and UK might offer some opportunities as well, with respectively 20k and 18.7k USD of estimated untapped potential.
- Competition in UAE, Kuwait and Qatar is similar in the sense that the largest supplier for these countries is Jordan. It holds over 40% market share in Qatar and 55% share in UAE. However, it is estimated that there is no additional untapped potential for Jordan in these markets. Therefore, it might be possible to compete and take some of Jordan’s market share.

KEY TAKEAWAYS
- Keep on focusing on exports to UAE. It already is a significant destination, but still offers good estimated untapped potential.
- Additional research should reveal the market opportunities for Palestine tomatoes in Kuwait and Qatar. Try to gain some market share in favor of Jordan in these countries.
- Try to compete with Tunisia and many other Middle Eastern countries to increase share in Russian Federation and UK.
- Do not forget about main current export markets Netherlands, Saudi Arabia, Israel and Norway.

Note: Actual exports are an average for 2012-2016 and potential is annual potential for the year 2021.
